

RYERSON IMAGE CENTRE-Opening Sept 29, 2012

Toronto's newest cultural attraction is the latest addition to Canada's gallery landscape. The Ryerson Image Centre, designed by Diamond Schmitt Architects, is a museum-standard facility with 4,500 square feet of exhibition space; a Great Hall for lectures, conferences, screenings and receptions; a glassed-in entrance colonnade; a temperature and humidity-controlled collections vault; and a state-of-the-art, professionally staffed research centre. The exterior LED lighting system transforms all four sides of the building into a work of art with a programmable and interactive dynamic light display.

The new Ryerson Image Centre is a renovation and expansion of the almost windowless former brick brewery distribution warehouse in downtown Toronto which has been home to the program for nearly fifty years. The new building features a transparent curtain wall system for program legibility and to dissolve barriers between indoor and outdoor public space on a high profile campus intersection.
